

About our fishing expert Frank Draijer:

Frank is 57 year young, and has been an angler all his life. Frank has lived in an area surrounded by dikes near the Dutch coast. Thus fishing became his biggest hobby at a young age, and his grandfather taught Frank just about everything there was to know.

Frank has been fishing at sea, in rivers and canals after species such as perch, pike, sea bass, cod and many more.

Around the year 2000, his interest in angling brought him to Norway, where he has gained experience in sea fishing, salmon fishing and fly fishing. For Frank, the Norwegian lakes, rivers and fjords are the ultimate nature- and sport fishing experience.

Frank has knowledge of both theory and practice when it comes to a wide range of fishing techniques and equipment - from bamboo rods to the leading brands in fishing equipment.

Frank worked as a host and fishing guide in the Namsenfjord and at Sula before moving to Inderøy.

Frank has also worked as a tour guide in China, where he was responsible for backpacking tours. But now it is Norway and fishing that applies!
